September 25, 2023

Dear Versatrim Customer,

As of January 7, 2023, the Formaldehyde Emission from Composite Wood Products Regulation (CANFER) went into effect. CANFER is Canadian federal regulation that falls under the Canadian Environmental Protection Act, 1999. CANFER applies to any Composite Wood Product (CWP), component parts or finished goods containing CWPs, that are sold, supplied, offered for sale, manufactured, or imported into Canada. The purpose of the regulation is to establish limits for formaldehyde emissions from CWP, to avoid harmful health effects. CANFER is written to mirror the Toxic Substances Control Act (TSCA Title VI), established by the US Environmental Protection Agency. The declaration certification only applies for the manufacturer of the composite wood products.

Versatrim is considered a Fabricator/Distributor of composite wood products under the EPA's TSCA Title VI regulations. CANFER has adopted the same recordkeeping and labeling requirements under CANFER as well. As an additional requirement, labels must be bilingual in English and French as follows, "TSCA Title VI certified / certifié conformément au titre VI de la TSCA." Versatrim is pleased to announce that we have been compliant with these requirements as of January 7th, 2023.

The most current version of this declaration is available on our website at www.versatrim.com

If you have additional questions or require further information, please feel free to contact your Sales Representative for assistance.

Sincerely,

Kimberly Blanton

Kimberly Blanton, Marketing Director
